

HARINI V

Coimbatore, India | 8825442039 | mail2hariniv@gmail.com | [LinkedIn](#) | [Github](#)

Education

Sri Ramakrishna Engineering College, Coimbatore

Sep 2023 - Apr 2027

Bachelor of Engineering, Computer Science & Engineering - 8.38 CGPA

Sri Vijay Vidyalaya Matric Higher Secondary School, Dharmapuri

2021 - 2023

HSC - 94%

2020 - 2021

SSLC - 100%

Internship

Bangalore, May 2025

Full stack Web Development Intern @Gozler Ed Tech

Applied full stack web development concepts using HTML, CSS, Javascript and backend technologies to build and enhance web applications

Projects

EEG Based Cognitive State Detection System

- Developed a cognitive state classification system using EEG signals acquired via OpenBCI Cyton board and Python-based processing pipeline.
- Performed time-series preprocessing and extracted statistical and frequency-domain features from raw EEG data.
- Implemented and optimized machine learning models (Random Forest, SVM, KNN) for multi-class cognitive state classification.
- Built an interactive Streamlit dashboard for real-time visualization and inference of model predictions.

Tech Stack: OpenBCI Cyton, EEG Signal Processing, Python, NumPy, Pandas, SciPy, Scikit-learn

Web App: AI-Powered News Aggregator

- Developed a full stack news aggregation platform fetching real time news using NewsAPI.
- Built RESTful APIs using Node.js and Express.js for news retrieval and data handling.
- Developed a responsive frontend using React and CSS with category and region based filtering.
- Implemented article search, bookmarking, and dynamic content rendering.

Tech Stack: React, CSS, Node.js, Express.js, NewsAPI, REST APIs

Smart Breast Cancer Risk Predictor :

- Built a machine learning based risk assessment prototype using dairy consumption patterns derived from peer reviewed research data.
- Performed data preprocessing, feature extraction and trained models such as Random Forest and Logistic Regression risk scoring.
- Presented solution at THEERVU'ATHON 2025, gaining exposure to startup-oriented problem solving.

Tech Stack : Python, NumPy, Pandas, Scikit learn, Matplotlib

Concept : Risk Prediction, Model Evaluation

Skills

Programming languages: Java, Python, Javascript

Tools : Git, Linux (Basic commands), Wireshark, Postman

Frontend : Html, CSS, React

Backend : Node.js, Express.js, REST APIs

Databases : MySQL

AI / ML : Scikit-learn, Pandas, Numpy

Networking : TCP/IP fundamentals, JSON, Packet Analysis(Wireshark)

Certifications

Introduction to Cybersecurity - Cisco

Linked list Basics - Great Learning

Cyber Security and Privacy - NPTEL

IIT Spoken Tutorial - Java

Graphs Camp Participation Certificate by Algo University
